Manual

Description

Do you intend to keep both track of the 2018 FIFA World Cup and to bet with or against your co-workers on the match results?

Then you are looking for our free WM2018 SharePoint app. With this app, you can bet on the results of every match as well as keep track of the results. In addition, you can have your own betting game competition and bet against your co-workers. Show your colleagues that you are the greatest FIFA World Cup expert!

Rules

The betting game is about betting results (including extra time and penalty shoot-outs) as accurately as possible.

Deadline for the submission of bets is always the official opening of a match. That means that you cannot bet anymore as soon as the game has started.

You can bet on every match, even if the teams haven't been determined yet.

The winner of the betting game is the one who has earned the most points at the end of the competition.

The scoring system works as following:

- 4 points for betting on the exact results correctly
- 3 points for the right tendency (correct bet on the winner and the goal difference)
- 2 points for the right victor or a draw tendency
- 0 points for anything else

Home

Home is the landing page of the World Cup 2018 app. Here you can find all matches listed by match day with additional information such as date, stadium and time. After a match has ended, you can find the final results here as well.

Additionally, there is a ranking list that compares you directly to your co-workers. Here you can track in detail where you and the 5 co-workers before and behind you are located on the list. The column „Points“ shows how many points you have earned on the current match day, and the column „Total“ shows the total points of your results for all match days.
